TALKING SCIENCE

FameLab 2018

International Echoes in Prague

9 November 2018, 10.30 and 15.30
Městská knihovna v Praze, Mariánské nám.1, Prague 1

Dr. Michael Londesborough presents the FameLab 2018 national finalists

Dr. Michael Londesborough, Ph.D.

Michael is a British scientist and science communicator. He is a researcher at the Institute of Inorganic Chemistry at the Czech Academy of Sciences where he specialises at Boron Hydrides. Michael runs science communication programmes with the British Council, which bring together students and researchers. He has been part of the FameLab competition in the Czech Republic since its beginning.

Ágnes Kis-Tóth / Hungary

Eötvös Loránd University, Department of Atomic Physics

Ágnes has been enchanted by Mathematics from early on, but discovered another true passion of hers during her studies: teaching. While teaching Maths in university, she finally succumbed to the temptation of Physics and went back to studying again. Now she is an Atomic Physics PhD student working with cosmological ionized bubbles.

Juan Margalef / Spain

Universidad Carlos III de Madrid

Juan is a mathematician and physicist doing his PhD at the Universidad Carlos III in Madrid. He has also enjoyed the universities and daily lives of Brussels, Vienna, Rio de Janeiro, Erlangen and Barcelona. One of his FameLab talks outlines the importance of questions in the discovery of new branches of knowledge.

Ruth Dudek-Wicher / Poland

Medical University of Wroclaw

Ruth has been admitted to a PhD in Pharmaceutical Microbiology and is investigating the structure of a bacterial biofilm, trying to determine what compounds will be able to eliminate it. A musician at heart, to find balance from her work Ruth loves to play violin, piano and ukulele.

Veli Vural Uslu / Germany

Universität Heidelberg

Veli was born in Turkey where he studied Chemistry and Maths, obtaining a BSc in Molecular Biology and Genetics. He went on to do internships in Italy, the USA and Germany and took up a PhD on Mouse Developmental Genetics at the University of Heidelberg, which landed him a post-doc at the Plant Physiology Department.

Lucy Guile / United Kingdom

National Health Service

Lucy works as a junior doctor, currently in paediatric surgery - which she loves. With a passion for healthcare in remote environments, medical and social research has taken her to Borneo, Peru, Ecuador, Fiji and the Himalayas, but wonderful family and friends means she can never stay away too long.

Maureen Williams / Ireland

Trinity College Dublin

Maureen hails from the centre of the Sunshine State: Orlando, Florida, where she grew up in the water. She's found a new home working in Irish waters at TCD, and her PhD links aquatic ecology, parasitology and zombies.

Lucie Doležálková / Czech Republic

Charles University, Prague

Lucie studies biochemistry at the Charles University in Prague. She enjoys science but also a lot of other things – these words can demonstrate it in short: plants, photography, hiking and climbing and playing recorders and saxophones.

Ansgar Gruber / Czech Republic

Czech Academy of Sciences

Ansgar has been curious about the world since his childhood. His studies have brought him from Germany to České Budějovice where he is working at the Czech Academy of Sciences researching algae. In his free time he enjoys diving and photography.
